1 Overview

The purpose of this document is to provide an overview of the SBL Pipeline Manager (SBL PM) application and to provide a guide that describes how to use the application. For the remainder of the document we refer to the tool as “SBL PM” or “the tool.”

2 Background

SBL PM is an externally hosted, web-based tool that enables Sellers and Freddie Mac to monitor the pipeline of Small Balance loans. The objective of this tool is to improve the efficiency of entering new small balance deals into the pipeline, updating information on these deals, and reporting on the pipeline.

3 Application Overview

SBL PM is a website that provides Sellers and Freddie Mac with information about Small Balance deals. It creates a centralized location to store this data with a uniform method to create the data. It allows all users to review and update their pipeline of deals.

SBL PM provides users with a combination of standard and custom reporting capabilities. Most of the reports are interactive in nature, allowing the user to apply custom settings to the report and export report content into various formats.

4 Minimum Browser Requirements

The minimum required browser is IE 7. Users on IE6 and below WILL NOT be able to access SBL PM. The minimum browser version outside of IE is unknown (eg: Chrome, Firefox).

5 SBL PM Support

Servicer user support for SBL PM:

- For any SBL PM issues, please contact email to SBL_Production@freddiemac.com

6 Accessing SBL PM

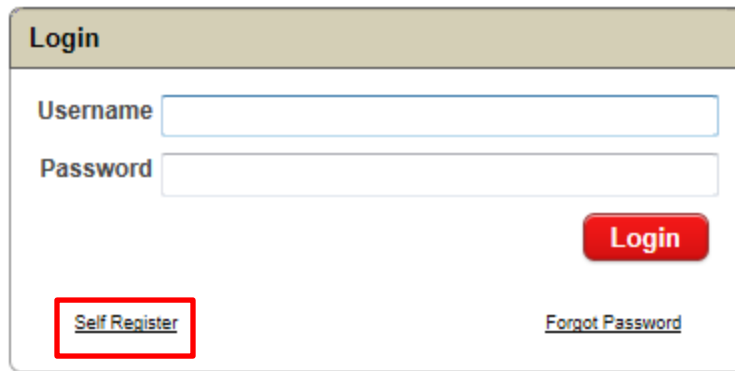

This section describes how to access SBL PM.

6.1 Website URL

Users can access the application via the following URL: <https://sbl.ficonsulting.com>. If the application fails to load, ensure the URL is using the https protocol.

6.2 Initial Registration and Login

Users can self-register for the application using the Self Register link on the Login screen:

The image shows a login form titled "Login" in a beige header. Below the header are two input fields: "Username" and "Password". To the right of the "Password" field is a red "Login" button. At the bottom left, the "Self Register" link is highlighted with a red rectangle. At the bottom right, there is a "Forgot Password" link.

Clicking the self-registration link will display the Account Registration form below. The users must enter all data on the screen. The user is required to accept the terms and conditions of use as part of the registration process by clicking the 'I Agree' box at the bottom of the screen. After populating all data, click 'Register' to submit an access request, or 'Cancel' to discard changes.

Account Registration

- Password must be at least 8 characters long.
- Password must contain at least one alphabetic character.
- Password must contain at least one numeric character.
- Password must contain at least one punctuation character. legal: "!'#\$%&()*'+-./:;<=>?_.,
- Password must contain at least one lower-case character.
- Password must contain at least one upper-case character.
- Password may not contain your username.
- Password cannot contain your First Name.
- Password cannot contain your Last Name.

Legal Notice

The financial and other information contained in the documents that may be accessed within this portal speaks only as of the date of those documents. The information could be out of date and no longer accurate. Freddie Mac does not undertake an obligation, and disclaims any duty, to update any of the information in those documents. Freddie Mac's future performance, including financial performance, and the performance of the mortgage-related securities found within this portal, are subject to various risks and uncertainties that could cause actual results to differ materially from expectations. The factors that could affect the company's future results are discussed more fully in our reports filed with the SEC and in the offering documents for the related series of mortgage-related securities.

Certain information contained in documents that may be accessed within this portal is provided by third parties. Freddie Mac makes no representations or warranties with respect to any such information and takes no responsibility for supplementing, updating or correcting any such information.

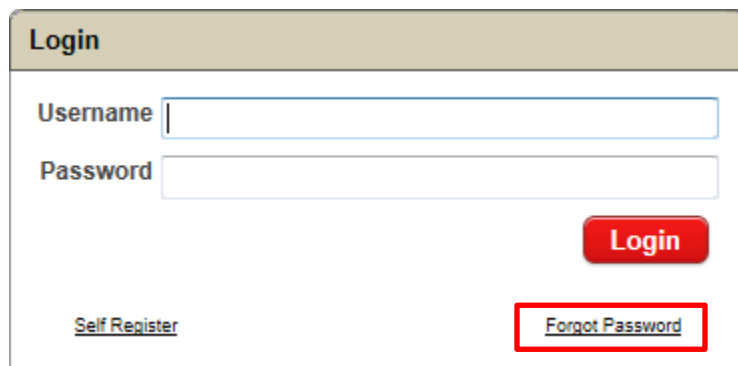

☒ I Agree

Selecting the 'Register' button will notify Administrators of the system of a request for access. Once a user is confirmed and granted access by an Administrator, the user will receive the email below indicating their account is ready for use:

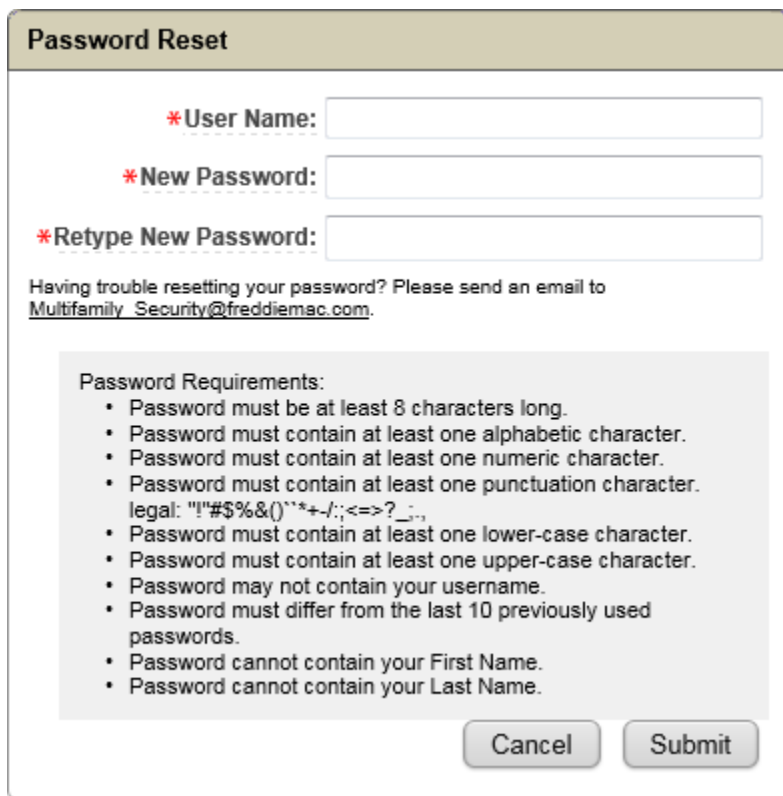

6.3 Forgotten Passwords

A user can click on the 'Forgot Password' link on the SBL PM Login page as indicated below to request a password reset.

Clicking on 'Forgot Password' will bring the user to the Password Reset page. The user enters their User Name and a new password. Clicking 'Submit' will generate an email to the account associated with the User Name. 'Cancel' will discard the action.

Password Reset

*User Name:

*New Password:

*Retype New Password:

Having trouble resetting your password? Please send an email to Multifamily_Security@freddiemac.com.

Password Requirements:

- Password must be at least 8 characters long.
- Password must contain at least one alphabetic character.
- Password must contain at least one numeric character.
- Password must contain at least one punctuation character.
legal: "!\"#\$%&()*~*-~!/:;<=>?_.,-"
- Password must contain at least one lower-case character.
- Password must contain at least one upper-case character.
- Password may not contain your username.
- Password must differ from the last 10 previously used passwords.
- Password cannot contain your First Name.
- Password cannot contain your Last Name.

Cancel Submit

As of SBL PM 2.0, the Password requirements are displayed at the bottom of every page where a password is created.

Additional PM SBL login features include:

- Maximum of four (4) login attempt failures.
- (5 seconds X n) lockout period between failed login attempts where N is the number of failed login attempts.

7 Application Navigation

7.1 Overview of Application Navigation

Application navigation is primarily from the menus at the top and left side of the screen. The top menu consists of the Logout, Home and Profile menu choices. The left side menu consists of navigation sections, with menu commands grouped by function as defined by the section header, such as Main Menu, Pipeline Reports, and Administrator Menu (Admins only). The left side menu is what the user will use most often.

7.2 Top Menu

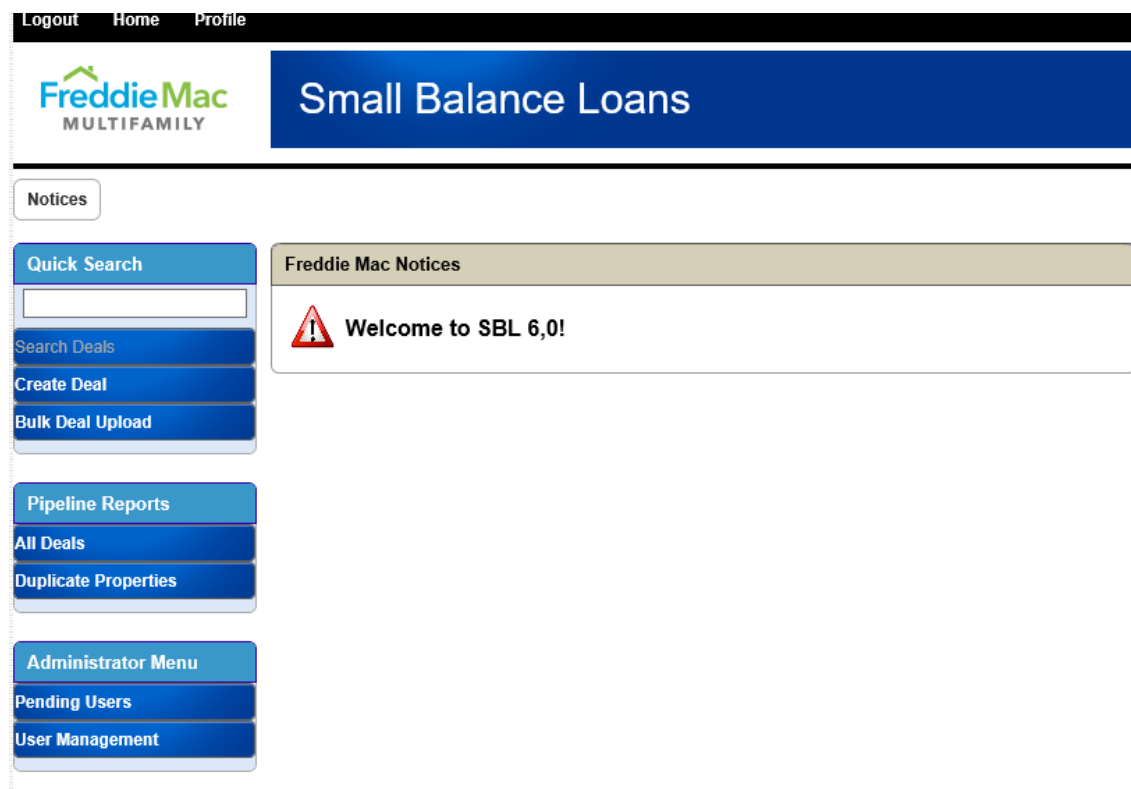

The top menu contains the Logout, Home, and Profile options. These buttons are available from any web page in the Tool.

Logout: Selecting logout allows users to end their session at any time.

Home: Selecting Home brings users to the Notices page. The home screen displays notices that are pertinent to all users, such as system maintenance schedules, and user support options.

Profile: Selecting Profile allows users to see their user information. See section 7.3 for more details.

7.3 Updating the User Profile and Changing Your Password After Login

After logging in, users can change their passwords and update other profile information at any time by clicking on the Profile link in the upper left hand corner of the screen. Users can modify their First Name, Last Name, email address, phone number, or update their password. Users cannot modify their Role, Access Type or Party. Administrators can edit these properties for each user if necessary; see section **Error! Reference source not found.** for more details.

Password Requirements:

- Password must be at least 8 characters long.
- Password must contain at least one alphabetic character.
- Password must contain at least one numeric character.
- Password must contain at least one punctuation character. legal: !"#\$%&'()*+,-./:;<=>?_`~.,
- Password must contain at least one lower-case character.
- Password must contain at least one upper-case character.
- Password may not contain your username.
- Password must differ from previously used passwords in the last 270 days.
- Password cannot contain a Dictionary word.
- Password cannot contain your First Name.
- Password cannot contain your Last Name.

7.4 Left-Side Menu Bar Options

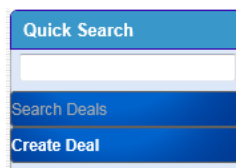

The left-side menu is where most of the functionality, commands and navigation links reside. The sections of the menu bar consist of Quick Search, Pipeline Reports, and Administrator Menu.

7.5 Quick Search

The Quick Search menu has two options, Search Deals and Create Deals.

7.5.1 Search Deals

Upon entering text into the search box, the Search Deals button activates.

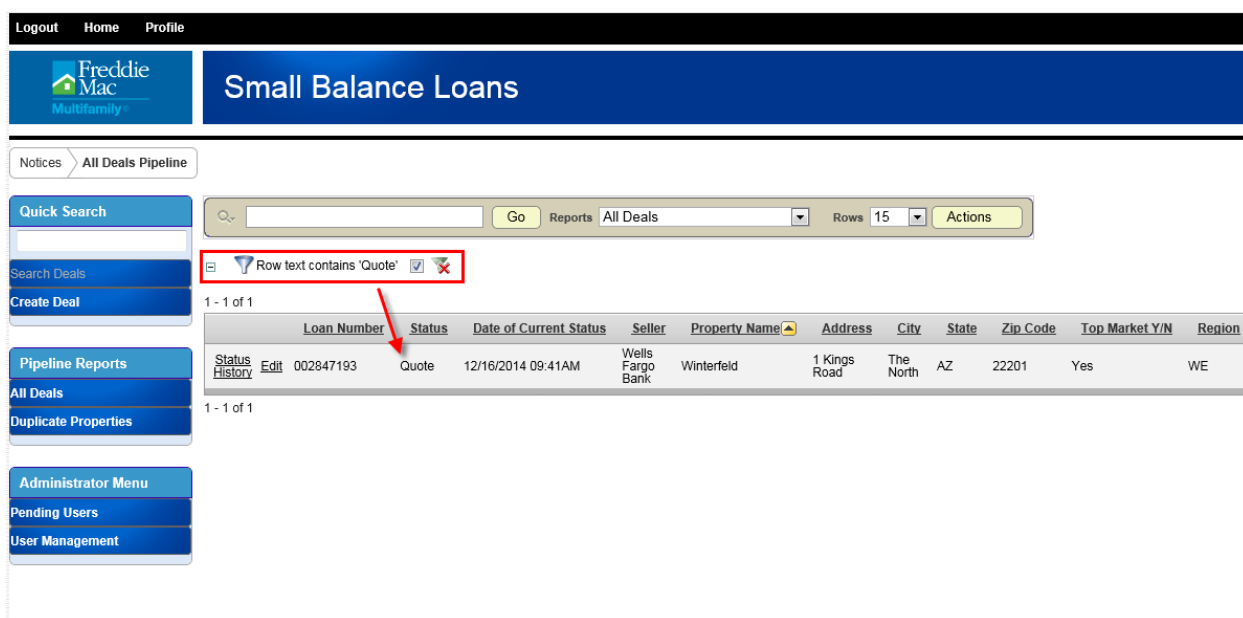

Quick Search

Search Deals

Create Deal

Clicking Search Deals will search all columns in the default pipeline view for the word in the search box.

Audit Information

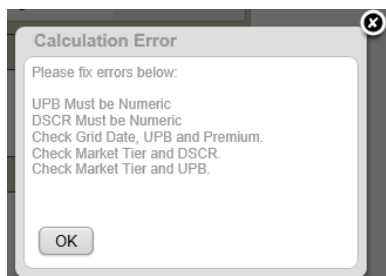

Create Deal is 2 step processes:

Step 1: Users must enter a value in every field marked with a red asterisk. Upon entering the required data, the user can click the Create New Deal button. This will create a new record in the system and bring the user to Create/Edit Deal screen. Clicking the Cancel button will return the user to the Pipeline screen without creating a new record.

Step 2: Click on **Pricing Calculator** Tab. You will now see “Calculate and Save” button. Click on “Calculate and Save” button. In case of no errors “Calculation and Save Success” message box will be displayed with updated “Application Coupon Rate” and also Pricing calculation history is saved. Click OK. If you Click the Apply Changes button will update record in the system and bring the user to the Pipeline screen.

In case of errors, Calculation Error message box will display with the possible fields that needs user attention. For example, if UPB must be numeric, you need to enter valid number for UPB.

Calculate and Save Button:

The screenshot shows the top navigation bar with tabs: Property Detail, Loan Terms, Key Dates, Deal Contacts, Inspection, Notes, and Pricing Calculator. The Pricing Calculator tab is active. Below the tabs, there is a 'Pricing Calculator' section with a 'Calculate and Save' button.

If you Click the Calculate and Save button, will do all the Pricing calculations and will save the history. You can see all the calculations as shown below picture.

Create/Edit Deal

The screenshot shows the 'Pricing Calculator' tab with the following sections:

- Loan**

Admins can update the user's name, email, phone number, and role. Admins can also lock and deactivate users from this screen. The Update button will save the changes and return the admin to the User Management screen. The Cancel button will discard all changes and return the admin to the User Management screen.

7.8 Search Functionality

The Search capability in SBL PM allows users to easily aggregate, filter and find data. Users may enter any number, text or date in the Search field and click 'Go' to see the records containing their search criteria.

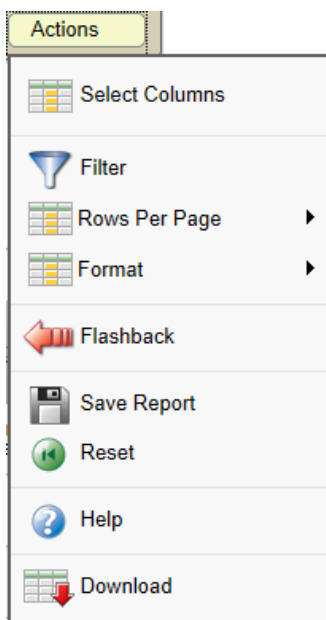

Once a search filter is applied, the criteria appear below the Action Bar. To lift the criteria, users can uncheck the green check box. This will allow users to apply the criteria at a later point. To remove the filter entirely, users can click the red x filter button.

Internal Stuff goes here

7.9 Actions Button Functionality

Users can click on the 'Actions' button to display a menu of possible actions. **Make sure to use the 'Save Report' action after each report change and prior to moving to a different report. If you move to a different report without saving the report, all changes will be lost. There will not be any warning message.**

7.9.1 Select Columns

Users will see two boxes, one representing columns that are not displayed on the left, the other representing the columns and order of the data that is displayed in the report on the right. Users can use the buttons in between the boxes to control what data displays on their screen. The double arrow moves all items from one box to the other. A single arrow moves only selected items to the other box. To select multiple items, press-and-hold the Ctrl key. The arrows to the right move the order of columns. The arrow with a line above or below moves a selected item to the top or bottom of the list on the right. The arrow without a line moves the selected column up

or down by one space. Users can select and arrange data to their preference using this function. Clicking 'Apply', will implement the changes. 'Cancel' will discard changes to the display.

7.9.2 Filter

The filter function allows users to filter the data displayed. Users may opt to filter information by either Column or by Row.

Filter by column: provides a dropdown of all columns available to filter data on. The Operator allows the user to select the correct filter function. The Expression populates with relevant data depending on which column the user has selected to filter. Users can choose 'Apply' to implement changes, or 'Cancel' to discard any changes.

Filter by Row: users can enter the name of their filter. This name will display on the screen after the filter is applied. Users can click on items in the 'Columns' box and operators in the 'Functions / Operators' box to build a filter expression. The Eraser button next to 'Filter Expression' will erase the expression. 'Apply' will implement the change, 'Cancel' will discard changes.

Filter

Filter Type ☐ Column ☒ Row

Name X

Filter Expression

Columns	Functions / Operators
A. Pipeline Id (unique Identifier)	!=
B. Loan Number	<
C. Status	<=
D. Date of Last Status Update	=
E. Property Name	>

Cancel Apply

Once a filter is applied, it will display on the screen with the name the user entered.

Multiple filters may be applied to a report, but they must be created one at a time. When filters are created, care must be taken to ensure that the filters don't overly restrict the viewable data. For example, if you want to filter a report by a value in a drop-down box, for example Request Type, you can create a column filter and select the value you want to filter by. However, if you want to display more than one value, you can create a second filter and apply them both to the report. To avoid "over filtering" the report, the user can utilize the Row Filter and manually type an expression in the Filter Expression text box of the Row Filter Type. As shown in the below screen shot, you can use the OR operator in the expression to filter on multiple values. In the expression below, C is the column for Status. The values in quotes are the desired filters. The values must be spelled exactly as displayed in the Request Type column of the report. You could also use the LIKE operator if you are unsure of the exact spelling, however, this may also return unwanted records.

 **Filter**

Filter Type ☐ Column ☒ Row

Name ×

Filter Expression 

Columns		Functions / Operators	
A.	Pipeline Id (unique Identifier)	I=	
B.	Loan Number	<	
C.	Status	<=	
D.	Date of Last Status Update	=	
E.	Property Name	>	

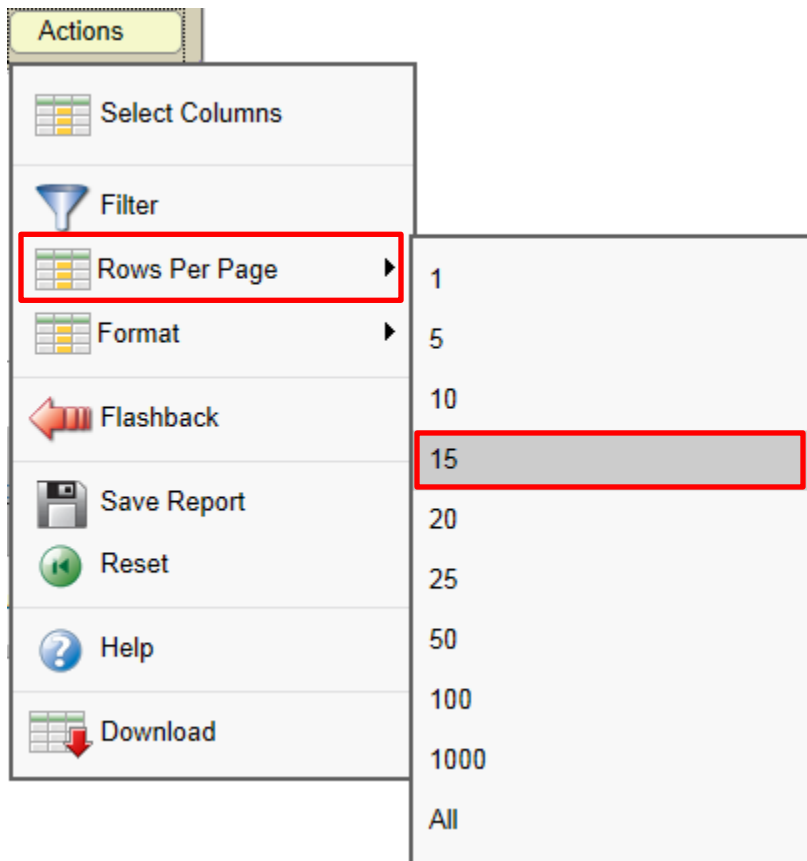

Cancel

Apply

Users can lift the filter by un-checking the check box. This removes the filter from the data, but leaves the filter displayed for the user to apply at a later point. Users can delete the filter entirely by clicking the red x over the filter. Once deleted, users would have to rebuild the filter to use it again.

7.9.3 Rows Per Page

Rows per page allows the user to determine the number of rows to display on a page. Users can select the desired number of rows to display. Remember however, that displaying a large number of records may impact the performance of the web page. When the report is saved as explained below, the setting for Rows Per Page will be saved as well.

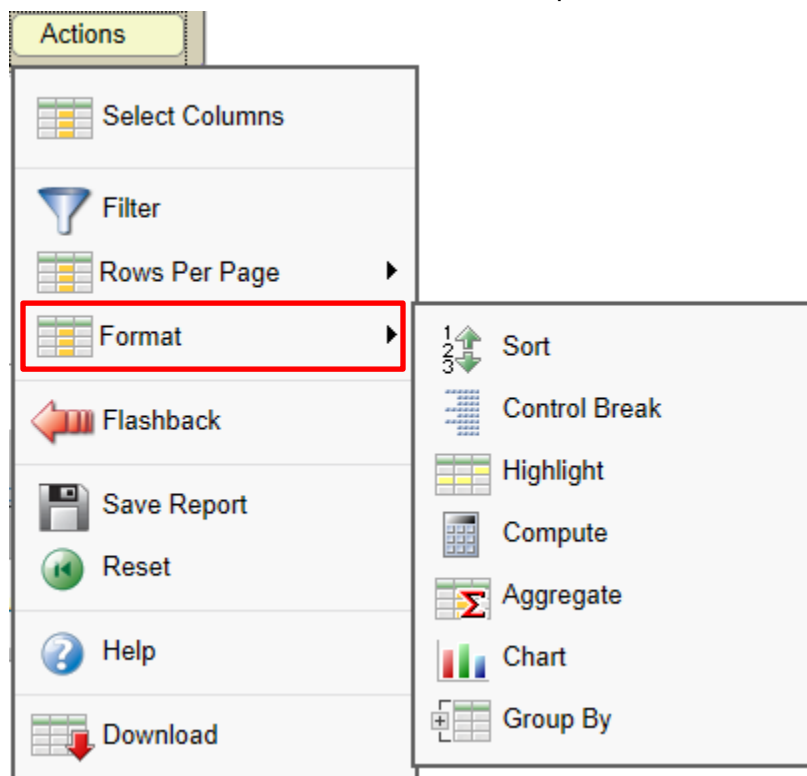

Rows can also be altered using the dropdown in the tool bar:

7.9.4 Format

Users can select from a menu of Format options.

7.9.5 Sort

Sort provides up to six columns from which users can sort data for display. Users can designate a direction for each column. Clicking 'Apply' will implement the changes, clicking 'Cancel' will discard changes.

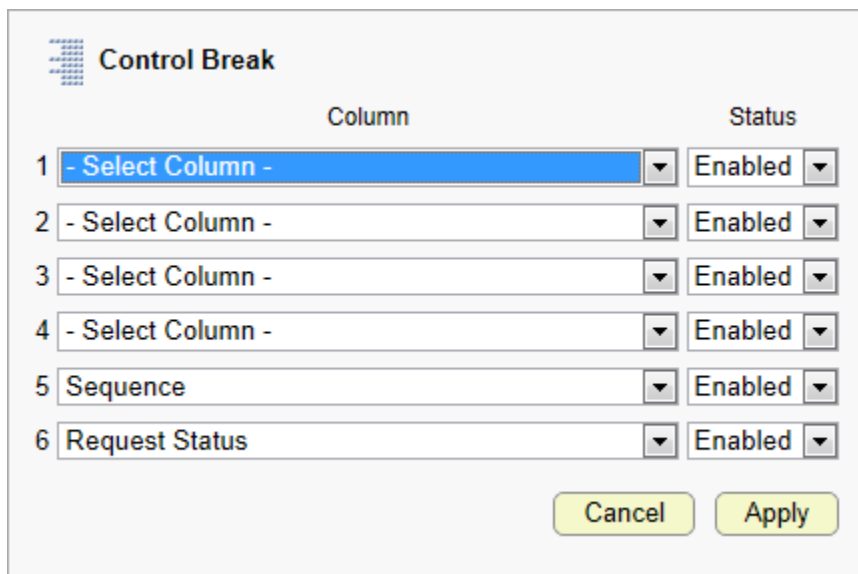

The screenshot shows the 'Sort' dialog box. It has a title bar with a sort icon and the word 'Sort'. The dialog contains a table with three columns: 'Column', 'Direction', and 'Null Sorting'. There are six rows in the table. The first row is selected, showing 'Property Name' in the 'Column' column, 'Ascending' in the 'Direction' column, and 'Default' in the 'Null Sorting' column. The other five rows show '- Select Column -' in the 'Column' column, 'Ascending' in the 'Direction' column, and 'Default' in the 'Null Sorting' column. At the bottom right of the dialog, there are two buttons: 'Cancel' and 'Apply'.

	Column	Direction	Null Sorting
1	Property Name	Ascending	Default
2	- Select Column -	Ascending	Default
3	- Select Column -	Ascending	Default
4	- Select Column -	Ascending	Default
5	- Select Column -	Ascending	Default
6	- Select Column -	Ascending	Default

Cancel Apply

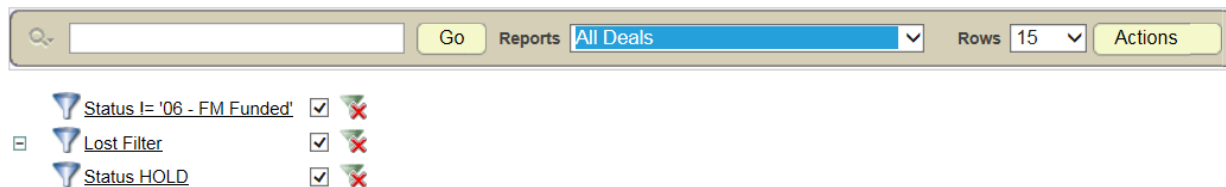

7.9.6 Control Break

Control break will provide users up to 6 columns to implement breaks in the data set. A user can apply a control break, which will appear on the home page below the Tool Bar.

The Control Break dialog box contains a table with 6 rows. Each row has a 'Column' dropdown and a 'Status' dropdown. The first four rows have '- Select Column -' in the Column dropdown and 'Enabled' in the Status dropdown. The fifth row has 'Sequence' in the Column dropdown and 'Enabled' in the Status dropdown. The sixth row has 'Request Status' in the Column dropdown and 'Enabled' in the Status dropdown. At the bottom right are 'Cancel' and 'Apply' buttons.

	Column	Status
1	- Select Column -	Enabled
2	- Select Column -	Enabled
3	- Select Column -	Enabled
4	- Select Column -	Enabled
5	Sequence	Enabled
6	Request Status	Enabled

The Tool Bar shows a search box, a 'Go' button, a 'Reports' dropdown set to 'All Deals', a 'Rows' dropdown set to '15', and an 'Actions' button. Below the Tool Bar is a list of filters with checkboxes and red X marks.

Filter	Checkmark	Red X
Status != '06 - FM Funded'	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Lost Filter	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Status HOLD	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Users can lift the control break by unselecting the green check mark. This will lift the break from the data, but allow the user to re-apply it if they wish. Users can completely remove the control break by clicking the red x mark.

Control breaks separate the data by control break category.

7.9.7 Save Report

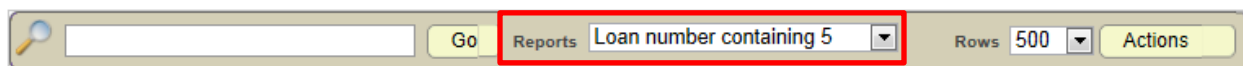

Make sure to use the 'Save Report' action after each report change and prior to moving to a different report. If you move to a different report before saving, all changes will be lost. There will not be any warning message.

Users can use all of the tools and functions described to compile data as they desire. Users can then save these parameters to use the next time they log into SBL PM. Save Report allows users to save these parameters and provide a report name and description. This report will be available every time the user logs into SBL PM. Clicking on 'Apply' will save the report under the specified name, clicking on 'Cancel' will discard the action.

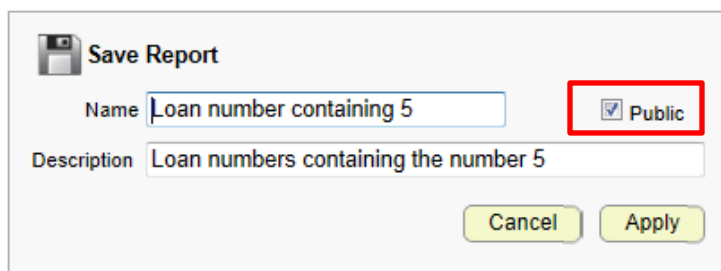

The 'Save Report' dialog box contains a 'Name' field with the text 'Loan numbers containing 5' and a 'Description' field with the text 'Loan numbers containing the number 5'. At the bottom right are 'Cancel' and 'Apply' buttons.

Once a report is saved, it will be available in the Reports drop down selection.

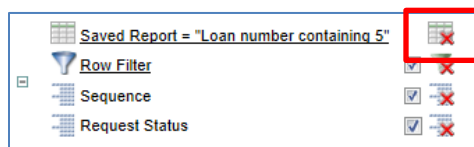

The toolbar shows a search bar, a 'Go' button, a 'Reports' dropdown menu currently showing 'Loan number containing 5', a 'Rows' dropdown set to '500', and an 'Actions' button. The 'Reports' dropdown is highlighted with a red box.

The 'Save Report' dialog box is shown again, but with an additional 'Public' checkbox checked and highlighted with a red box. The 'Name' field contains 'Loan number containing 5' and the 'Description' field contains 'Loan numbers containing the number 5'. 'Cancel' and 'Apply' buttons are at the bottom right.

To delete a Saved Report, click the Red X next to the name of the report as shown below.

A list of saved reports is shown. The first item is 'Saved Report = "Loan number containing 5"', which has a red 'X' icon next to it, highlighted with a red box. Below it are 'Row Filter', 'Sequence', and 'Request Status', each with a checkmark and a red 'X' icon.

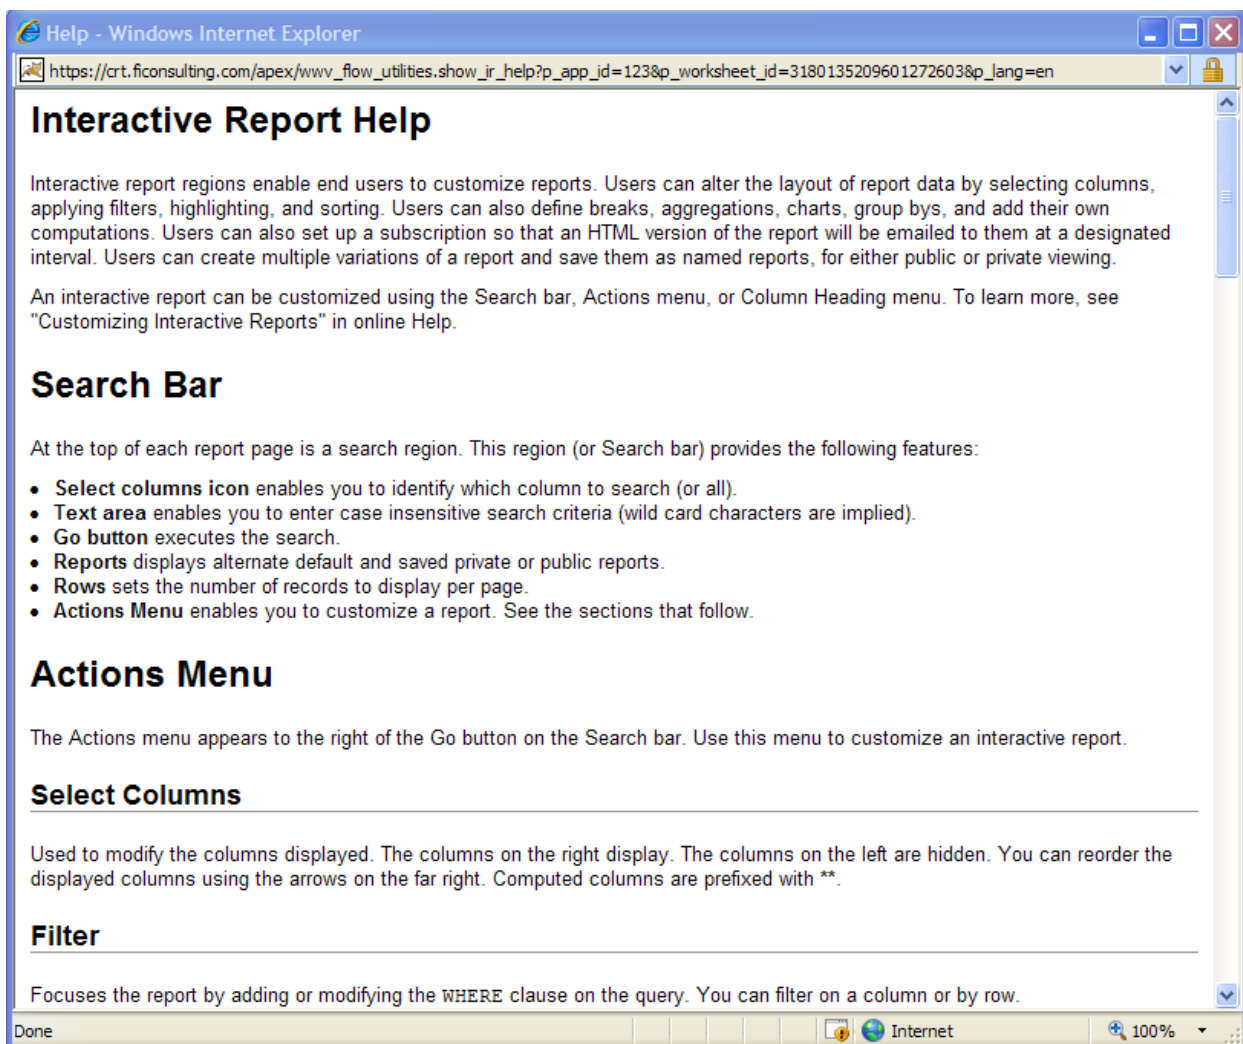

7.9.8 Reset

Reset allows a user to revert back to the last time the report was saved. Clicking 'Apply' will revert to default settings, clicking 'Cancel' will not revert to default settings.

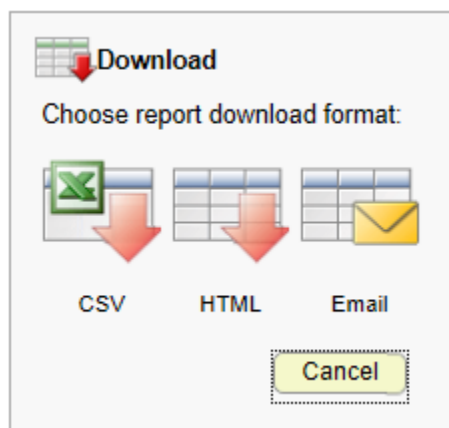

7.9.9 Help

Help provides a pop-up window with helpful tips on creating a report (performing actions) on the data.

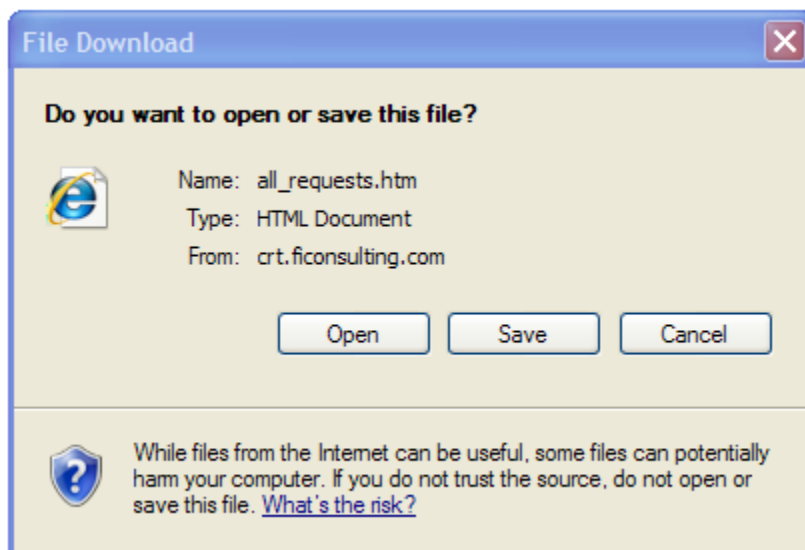

7.9.10 Download

Download allows users to download the data into .csv, .html, or email.

Selecting CSV or HTML will provide a pop-up file download box providing users the option to open, save or cancel.

Selecting 'Email' will provide users the option to enter one or multiple email addresses. Users can edit the prepopulated subject line.

An email will be sent with an attached .htm file containing the data.

 **Download**
