¹ Hybrid ARM consists of an initial fixed-rate period followed by a floating-rate period. During the floating-rate period the coupon is based on 6 month LIBOR + 325 margin. Every six months, the floating rate may increase or decrease by 1%, never be less than a floor of the initial fixed interest rate and never be greater than a maximum lifetime cap of the initial fixed interest rate + 5%.

² Prepay description: For example, for a Hybrid ARM “321(3), 1%” refers to 3% for year 1 of the fixed-rate period, 2% for year 2, 1% for the next 3 years, then 1% during the remaining floating-rate period.

³ Higher of yield maintenance (YM) or 1% during the YM period. See Fixed Rate notes for details.

⁴ With respect to Hybrid ARM mortgage loans with yield maintenance, for any prepayment made during the yield maintenance period, the prepayment charge will initially be the greater of (i) 1.0% of the unpaid principal balance or (ii) yield maintenance, plus 1% of the projected unpaid principal balance outstanding as of the first payment date after the Initial Fixed Rate Period. Any prepayment made after the yield maintenance period, the prepayment charge will be 1.0% of the unpaid principal balance. See Hybrid ARM notes for details. ⁵ Top Markets only on 5-year fixed and Hybrid ARMs.
