# Introduction

## Welcome

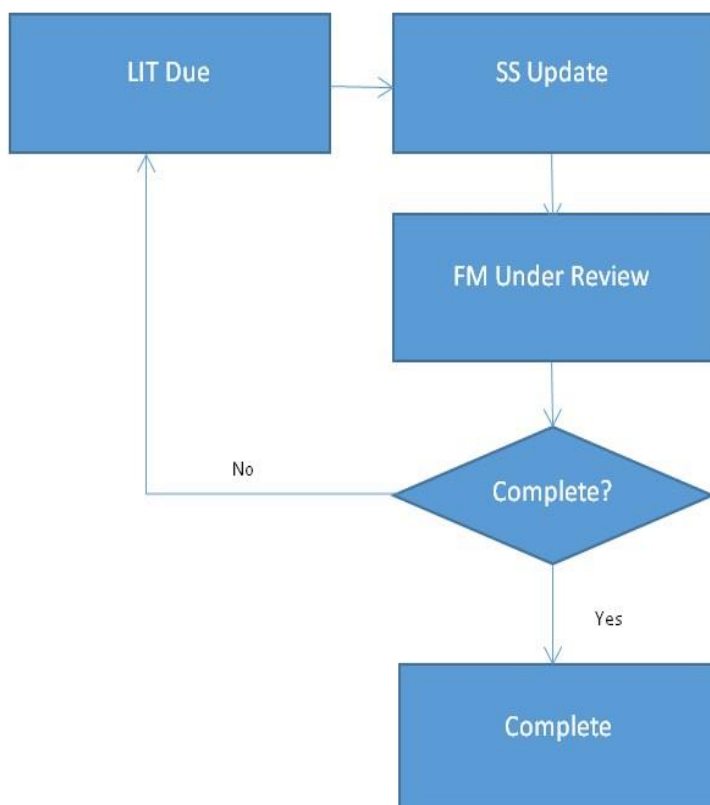

Freddie Mac's Property Reporting System (PRS) has been enhanced to facilitate the creation of Loan Item Tracking (LIT) items and updates of LITs by the seller/servicer. PRS gives servicers the ability to download a compliance report of due LIT items and review and update LITs.

LITs move through the following workflow statuses:

1. **Compliance Due:** LIT is due from seller/servicer
2. **FM Under Review:** LIT is being reviewed by Freddie Mac
3. **Complete:** LIT has been completed by Freddie Mac

## Workflow Process

This chart represents the flow of tracking items through PRS.

# Common Controls

## Grids

Many screens in PRS are grid based that include similar functionality. This functionality is enabled as needed on each grid and is not available on all pages depending on required functionality. This section reviews the basic functionality of the grids that apply across the system.

### Sorting

If sorting is enabled, users can sort the grid by any column by clicking on the column header.

The sorting function toggles between three modes:

- Ascending
- Descending
- No Sort

CustomerID	CompanyName	ContactName	ContactTitle ^	Address	PostalCode
BOTTM	Bottom-Dollar Markets	Elizabeth Lincoln	Accounting Manager	23 Tsawassen Blvd.	T2F 8M4
FISSA	FISSA Fabrica Inter. Salchichas S.A.	Diego Roel	Accounting Manager	C/ Morazarzal, 86	28034
HANAR	Hanari Carnes	Mario Pontes	Accounting Manager	Rua do Paço, 67	05454-876
LILAS	LILA-Supermercado	Carlos González	Accounting Manager	Carrera 52 con Ave. Bolívar #65-98 Llano Largo	3508
QUEDE	Que Delícia	Bernardo Batista	Accounting Manager	Rua da Panificadora, 12	02389-673
QUICK	QUICK-Stop	Horst Kloss	Accounting Manager	Taucherstraße 10	01307

WARTH	Wartian Herkku	Pirkko Koskitalo	Accounting Manager	Torikatu 38	90110

 Page size: 10 
91 items in 10 pages

Some grids have a default sort enabled. The user can override the default by clicking the header to sort by a different column. If the user leaves the page and returns, the grid will return to the default sort.

### Filtering

When filtering is enabled, a [filtering item](#) appears below the column header. The user can enter a filter criterion in the filter box. A drop-down list allows the user to select a filter expression that is applied to the criterion for the column. When the user presses the filter button (next to the filter box), the grid displays only the records matching the filter criteria specified using the filter boxes:

CustomerID	CompanyName	ContactName	C
<input type="text"/>	Ant <input type="text"/>	<input type="text"/>	<input type="text"/>
ALFKI	Alfreds Futterkiste		
ANATR	Ana Trujillo Emparedados y helados		
ANTON	Antonio Moreno		

- > NoFilter
- Contains
- DoesNotContain
- StartsWith
- EndsWith

All filters in a single table are applied using AND operator. That is, only items (grid rows) that comply with all filters are displayed.

**Note:** When you have more than one value to filter, values should be entered separated by a space.

## Row Selection

### Selecting a Row with a Click

Users can select a single data row in the grid by left clicking anywhere within the row.

The Context Menu offers a limited set of choices that are available in the current state, or context, of the items on the grid.
