

SB-Deal® X1 Bond Program

The SB-Deal® X1 is a Freddie Mac guaranteed interest-only bond, with both coupon and prepayment fees as dual income sources, providing a natural interest rate environment hedge.

Sample Structure and Waterfall – Senior Subordinate SB-Deals

- SB Certificates® include 5-, 7- and 10-year fixed-rate balloon mortgages as well as 10-year hybrid balloon mortgages with 5- and 7- year initial fixed-rate periods followed by floating-rate SOFR with six-month reset periods, and a 20-year hybrid balloon mortgage with a 10-year initial fixed-rate period followed by floating-rate SOFR with six-month reset periods, all with an array of prepayment options
- Freddie Mac does not guarantee a certain coupon to the X1 but rather guarantees the residual coupon will be paid. However, the guarantee does not cover any loss of expected yield to the X1 arising from reductions in the notional amount of the X1 or because of payment of additional interest amounts
- As an illustration only, due to the collateral mix varying from deal to deal, the X1 on a \$225 million deal typically has a ~\$2 price, or approximately \$5.6 million market value at the 15 Constant Prepayment Rate (CPR) pricing speed

Cash Flow

The pass-through rates for X1 certificates vary and are based, as shown in the chart below, on an initial fixed-rate period followed by one-month 30-day Average SOFR and will be subject to capped rates based on the weighted average net mortgage pass-through rate for the related loan group or for the mortgage pool.

Sample SB-Deal Rate and Coupon Structure – Senior Subordinate SB-Deals¹

¹The graph above demonstrates the pro rata pay structure before a Waterfall Trigger. For actual bond pricing, the senior bonds assume a 5% CPR prepayment speed until the earlier of each underlying loan's maturity date or first interest reset date, at which time the loans are assumed to pay off in full

Sample Structure and Waterfall – Fully Guaranteed SB-Deals²

Certain SB-Deal structures may have 100% Freddie Mac guaranteed A bonds and a single Freddie Mac guaranteed interest-only X1 bond.

Prepayment Premiums (Static Prepayment Premiums or Yield Maintenance)

- The X1 class is the 100% beneficial owner of prepayment fees/premiums collected
- One or more holder(s) representing the majority of X1 Certificates by notional amount may waive prepayment premiums
- Premiums are not due if resulting from condemnation³

Prepayment Premiums not Required

- All prepayment options are open for prepayment without premium for three months prior to maturity
- Hybrid ARMs can be prepaid without payment of a prepayment premium if (i) prepaid during the floating-rate period using the proceeds of a Freddie Mac loan that is the subject of a binding purchase commitment by Freddie Mac or (ii) as the result of the sale of the property to an unrelated third party in an arms' length transaction

Pricing Scenario

The X1 SB Certificate[®] is priced to a 15 CPR as a proxy for an average prepay speed for the collateral. Given the multiple bond classes in a deal, each with various prepay types, and considering the prepayment behavior we have observed since the SBL program was launched in 2014, the 15 CPR speed provides a much simpler and stable pricing mechanism. While in the short term, actual prepays are much slower than the 15 CPR speed, as loans season it is expected they will have speeds much faster than 15 CPR.

³ For loans originated after January 1, 2020 (or December 5, 2019 in the case of a mortgaged real property located in King County, WA) and either (1) such condemnation is intended to result in the continued use of the mortgaged real property subject to such condemnation for residential purposes or (2) applicable law expressly requires or permits that the condemning authority or acquiring entity reimburse prepayment premiums incurred in connection with a prepayment occurring as a result of a condemnation, a prepayment premium will be due to the extent permitted by applicable law.
